## WORK EXPERIENCE

### Software Engineer

Zehntech Technology PVT LTD Indore

06/2022 - Present

- Worked with software development and testing team members to design and develop robust solutions to meet client requirements for functionality, scalability and performance.
- Collaborated with a team of 10 -15 people to deliver successful projects.
- Reviewed project specifications and designed technology solutions that met or exceeded performance expectations.
- **Conducted code reviews** to uphold high-quality standards and maintain consistency within the team, integrating these practices into the CI/CD lifecycle.
- Discussed project progress with customers, collected feedback on different stages and directly addressed concerns.
- **Demonstrated expertise** in troubleshooting, debugging, and enhancing software systems to ensure reliability and scalability.
- Wrote clean, clear and well-tested code for various projects.
- Troubleshoot, debug and upgrade existing software.

### Intern Software Engineer

Zehntech Technology PVT LTD Indore

11/2021 - 06/2022

- Integrated new app features into existing projects, ensuring functionality and performance consistency across platforms.
- Collaborated with cross-functional teams, adhering to Agile methodologies to deliver projects smoothly through iterative development and release cycles.

HTML

CSS

JavaScript

Make.com

Webflow

Basic Angular

## PROJECTS

### RedmineFlux Product: Plugin and Theme Development

- Contributed to the **RedmineFlux** open-source project management tool by developing custom plugins and themes in **Ruby on Rails (RoR)**. Created feature-rich plugins to extend Redmine's functionality, including task management and user notification systems, while designing custom themes to enhance the UI/UX. Leveraged Redmine's API and Ruby on Rails framework for seamless integration and scalability.
- **Key Contributions:** Developed custom plugins to extend Redmine's core functionality. Designed and implemented responsive themes for a modern user interface. Integrated with Redmine's built-in API for data handling and management. Ensured compatibility with different Redmine versions and optimized for performance.

### Wift - Automotive Leasing Startup

- In the Wift project, I enhanced user experience for Chile's automotive leasing startup by recreating the homepage and other pages with **Bubble.io** responsive engine and integrating new Figma-designed pages. Continuous site improvements demonstrated dedication to client satisfaction and evolving needs. Role & Responsibilities • Redesign some existing pages with responsive engine. • Integrated Figma-designed pages seamlessly into the existing website. • Continuously improved and updated the site to meet evolving client needs. Technology Used: Bubble & Figma.

### Compliancegate - Service provider

- In Compliancegate, I revamped the client's site using Bubble.io and integrated WordPress smoothly. I added an AI tool for quick compliance Q&A, generating product lists, certificates, labels, and aiding in lab testing. It's about simplifying US and EU compliance for user-friendly solutions. Role & Responsibilities • Analyzed and replicated the client's website in Bubble. • Ensured a smooth integration of WordPress users into the Bubble platform. • Implemented an AI tool enabling users to ask compliance-related questions and receive instant responses. Technology Used: Bubble & WordPress
